The Fund shall value its investments according to the valuation norms, as specified in Schedule VIII of the Regulations, or such norms as may be prescribed by SEBI from time to time. The broad Valuation norms are detailed below:

i) Equity and Equity related Securities

1. Traded Securities -

- The securities shall be valued at the last quoted closing price on the stock exchange.
- When the securities are traded on more than one recognised stock exchange, the securities shall be valued at the last quoted closing price on the stock exchange where the security is principally traded.
- When on a particular valuation day, a security has not been traded on the Principal stock exchange, the value at which it is traded on another stock exchange may be used.
- When a security (other than debt securities) is not traded on any stock exchange on a particular valuation day, the value at which it was traded on the selected stock exchange, as the case may be, on the earliest previous day may be used provided such date is not more than thirty days prior to valuation date.

2. Thinly Traded Securities- :

Thinly Traded Equity/Equity Related Securities:

- "When trading in an equity/equity related security (such as convertible debentures, equity warrants, etc.) in a month is both less than Rs. 5 lakh and the total volume is less than 50,000 shares, it shall be considered as a thinly traded security and valued accordingly"
- For example, if the volume of trade is 100,000 and value is Rs. 400,000, the share does not qualify as thinly traded. Also if the volume traded is 40,000, but the value of trades is Rs. 600,000, the share does not qualify as thinly traded. In order to determine whether a security is thinly traded or not, the volumes traded in all recognised stock exchanges in India may be taken into account.

3. Valuation of Non-Traded / Thinly Traded Securities:

Non traded/ thinly traded securities shall be valued "in good faith" by the AMC on the basis of the valuation principles laid down below:

Non-traded / thinly traded equity securities:

Based on the latest available Balance Sheet, net worth shall be calculated as follows:

Net Worth per share = [Share capital + reserves (excluding revaluation reserves) – Misc. expenditure and Debit Balance in P&L A/c] Divided by number of Paid up Shares.

Average capitalisation rate (P/E ratio) for the industry based upon either Bombay Stock Exchange Limited (BSE) or National Stock Exchange of India Limited (NSE) data (which should be followed consistently and changes, if any noted with proper justification thereof) shall be taken and discounted by 75% i.e. only 25% of the Industry average P/E shall be taken as capitalisation rate (P/E ratio). Earnings per share of the latest audited annual accounts will be considered for this purpose.

- The value as per the net worth value per share and the capital earning value calculated as above shall be averaged and further discounted by 10% for ill-liquidity so as to arrive at the fair value per share.
- In case the EPS is negative, EPS value for that year shall be taken as zero for arriving at capitalised earning.
- In case where the latest balance sheet of the company is not available within nine months from the close of the year, unless the accounting year is changed, the shares of such companies shall be valued at zero.
- In case an individual security accounts for more than 5% of the total assets of the Scheme, an independent valuer shall be appointed for the valuation of the said security.
- To determine if a security accounts for more than 5% of the total assets of the Scheme, it should be valued by the procedure above and the proportion which it bears to the total net assets of the Scheme to which it belongs would be compared on the date of valuation.

4. Non Traded Securities :

When a security (other than Government Securities) is not traded on any stock exchange for a period of thirty days prior to the valuation date, the scrip must be treated as a 'non traded' security.

5. Valuation of Unlisted Equity Shares:

Unlisted equity shares of a company shall be valued "in good faith" on the basis of the valuation principles laid down below:

- (1) Based on the latest available audited balance sheet, net worth shall be calculated as lower of (a) and (b) below:
 - (a) Net worth per share = [share capital plus free reserves (excluding revaluation reserves) minus Miscellaneous expenditure not written off or deferred revenue expenditure, intangible assets and accumulated losses] divided by Number of Paid up Shares
 - (b) After taking into account the outstanding warrants and options, Net worth per share shall again be calculated and shall be = [share capital plus consideration on exercise of Option/Warrants received/receivable by the Company plus free reserves (excluding revaluation reserves) minus Miscellaneous expenditure not written off or deferred revenue expenditure, intangible assets and accumulated losses] divided by {Number of Paid up Shares plus Number of Shares that would be obtained on conversion/exercise of Outstanding Warrants and Options}

The lower of (a) and (b) above shall be used for calculation of net worth per share and for further calculation in (3) below.

- (2) Average capitalisation rate (P/E ratio) for the industry based upon either BSE or NSE data (which should be followed consistently and changes, if any, noted with proper justification thereof) shall be taken and discounted by 75% i.e. only 25% of the Industry average P/E shall be taken as capitalisation rate (P/E ratio). Earnings per share of the latest audited annual accounts will be considered for this purpose
- (3) The value as per the net worth value per share and the capital earning value calculated as above shall be averaged and further discounted by 15% for illiquidity so as to arrive at the fair value per share.

The above methodology for valuation shall be subject to the following conditions:

- (a) All calculations as aforesaid shall be based on audited accounts.
- (b) In case where the latest balance sheet of the company is not available within nine months from the close of the year, unless the accounting year is changed, the shares of such companies shall be valued at zero.
- (c) If the net worth of the company is negative, the share would be marked down to zero.
- (d) In case the EPS is negative, EPS value for that year shall be taken as zero for arriving at capitalised earning.
- (e) In case an individual security accounts for more than 5% of the total assets of the Scheme, an independent valuer shall be appointed for the valuation of the said security. To determine if a security accounts for more than 5% of the total assets of the Scheme, it should be valued in accordance with the procedure as mentioned above on the date of valuation.
- (f) At the discretion of the AMC and with the approval of the Trustees, an unlisted equity share may be valued at a price lower than the value derived using the aforesaid methodology.

6. Illiquid Securities:

- (1) Aggregate value of "illiquid securities" of Scheme, which are defined as non-traded, thinly traded and unlisted equity shares, shall not exceed 15% of the total assets of the Scheme and any illiquid securities held above 15% of the total assets shall be assigned zero value
- (2) All funds shall disclose as on March 31 and September 30 the Scheme-wise total illiquid securities in value and percentage of the net assets while making disclosures of half yearly portfolios to the unitholders. In the list of investments, an asterisk mark shall also be given against all such investments, which are recognised as illiquid securities.
- (3) Mutual Funds shall not be allowed to transfer illiquid securities among their Schemes with effect from October 1, 2000.
- (4) In respect of closed ended funds, for the purposes of valuation of illiquid securities, the limits of 15% and 20% applicable to open-ended funds should be increased to 20% and 25% respectively.

7. Value of "Rights" entitlement

- (1) Until they are traded, the value of the "rights" entitlement would be calculated as: $V_r = n/m \times (P_{ex} - P_{of})$ where
V_r = Value of rights
n = no. of rights Offered
m = no. of original shares held
P_{ex} = Ex-Rights price
P_{of} = Rights Offer price
- (2) Where the rights are not traded pari-passu with the existing shares, suitable adjustments would be made to the value of rights. Where it is decided not to subscribe for the rights but to renounce them and renunciations are being traded, the rights would be valued at the renunciation value.

8. Valuation Norms for Foreign Securities:

On the Valuation Day, the securities issued outside India and listed on the stock exchanges outside India shall be valued at the closing price on the stock exchange at which it is listed or at the last available traded price. However in case a security is listed on more than one stock exchange, the AMC reserves the right to determine the stock exchange, the price of which would be used for the purpose of valuation of that security.

Further in case of extreme volatility in the international markets, the securities listed in those markets may be valued on a fair value basis. For the purpose of valuing all overseas investments including American Depository Receipts (ADRs) / Global Depository Receipts (GDRs) listed on Stock Exchanges overseas, the following valuation procedure would be followed:

If the security is listed in a time zone ahead of India than the same days price closing price would be used for valuation. The price

in foreign currency would be obtained and based on the closing RBI reference rate, the valuation in Indian rupee would be done. If the price in Indian Rupees (INR) for the security is available then the same would be used for valuation.

If the security is listed in a time zone behind India's, than the previous days price would be used for valuation. The price in foreign currency would be obtained and based on the closing RBI reference rate, Indian rupee equivalent would be obtained. If the INR price for the security is available then the same would be used for valuation.

If the stock is listed in currency for which RBI reference rate is not available, the exchange rates available from Reuters (at 5.00P.M IST) will be used. In case the direct exchange rates are not available on Reuters, then cross currency rate with USD would be considered and converted as per the INR/USD RBI reference rate.

In case any particular security is not traded on the Valuation Day, the same shall be valued on a fair value basis by the Valuation Committee of the AMC

9. Valuation of Derivative Products:

- (1) The traded derivatives shall be valued at market price in conformity with the stipulations of sub clauses (i) to (v) of clause 1 of the Eighth Schedule to the Regulations as amended from time to time.
- (2) The valuation of untraded derivatives shall be done in accordance with the valuation method for untraded investments prescribed in sub clauses (i) and (ii) of clause 2 of the Eighth Schedule to the Regulations as amended from time to time.
- (3) The valuation of the Scheme's assets and calculation of the Scheme's NAV shall be subject to audit on an annual basis and such regulations as may be prescribed by SEBI from time to time.

ii. Valuation of Debt and Money Market Instruments

Broadly the following principles would be applicable for valuation of different instrument types across all schemes:

- If the security is traded, then weighted average traded (clean) prices would be considered for valuation. Trade recognition criteria has been outlined in Section 1,
- Non-traded or thinly traded Bonds/ Debentures/ PTCs etc would be valued through Crisil Bond Valuer. Discretionary Discount/ Premium for illiquidity would be provided to the extent necessary in order to reflect fair valuation levels. There would be no restrictions on the allowed spread relative to the benchmark curve in respect of different issuers and instruments based on the AMFI best practices circular dated 15th May 2012.
- Fund Managers would be responsible for recording the justifications for any changes in the illiquidity premium/ discounts and the same would be reviewed by the Head Fixed Income and the Risk Management team on a daily basis
- Non traded / Thinly traded security with less than and upto 60 days to maturity would be amortized. The valuation principle for such securities has been outlined in section 5.1 using the weighted average traded yield
- Securities with call and put options would be valued as per SEBI guidelines of taking the lowest/ highest value on call/ put dates and maturity dates.
- Securities having put and call options on the same day but at differential prices would be valued as follows
 - Find out the lowest value obtained by valuing at various call dates and valuing at maturity date
 - Find out the highest value obtained by valuing at various put dates and valuing at maturity date
 - Take the lower price of the above two.
- Valuation committee would meet at least once in a quarter or on need basis
- New Security can be valued at the purchase price for a period of 15 days from the date of purchase only if it has been bought in a private placement.
- This policy would be reviewed and revised (if needed) by a member of valuation committee in the event of any new guidelines issued by SEBI or any other regulatory organization. Further, it is mandatory to necessarily review the valuation policy on an annual basis. It would be responsibility of the compliance team to update the investment team as well valuation committee of any new regulatory guidelines pertaining to valuations. On an annual basis, the policy would be approved by Board of Directors and Board of trustees.
- Valuation committee would review :
 - Valuation of all securities across all schemes
 - All inter -scheme transfers
 - Mark -up/ down valuation yield and changes therein
 - Any exceptions to the valuation policy
- Approved copy of the valuation policy would be provided to the fund accountants, who would then be responsible for carrying the valuations as per the policy. Further, Fund Accountants would be required to certify on a fortnightly basis that all valuations have been carried out as per the policy. If required, Service Level Agreement would be suitably modified.
- All interscheme transfers would be signed by fund managers, risk management and the head Fixed Income on a daily basis. Further all inter scheme transfers would be reviewed by the head compliance.
- Mark up/ downs in valuation yield or any changes there in would be communicated in writing to the fund accountants and would be preserved for future records.
- All securities Valuation would follow Fair valuation principle and suitable methodology will be adopted considering the relevant parameters of individual securities.
- As per SEBI Circular, for debt instrument which are new and valuation models are not available, valuation would be at cost or internally developed valuation models to be decided on case to case basis. Relevant extracts from the Circular are as follows:
 - a) Exposure should not exceed 5% of total AUM of the scheme
 - b) These models have to be approved by independent Trustees and Statutory auditors.

- c) The AMC would escalate the new instruments to AMFI for getting valuation pertaining to them incorporated in valuation framework within a period of 6 weeks.
- If the security is traded then security would be valued at the weighted average traded price.
Traded price, wherever available shall be used for valuation. To remove distortions due to the settlement dates (e.g. across a weekend/holidays, same day value), weighted average traded yields will be used to arrive at the t+1 equivalent trade price for valuation purposes

1. Definitions

1.1 Recognition of Trades for Valuation Purpose

For Instruments maturing above 1 year

Weighted average traded price may be taken if there are at least 2 market trades aggregating to Rs 25 Crores or more for the specific security

For Instruments maturing between 60 days to 1 year

Weighted average traded price may be taken if there are at least 3 market aggregating to Rs 100 crores or more for the specific security

For Instruments maturing upto 60 days

Weighted average trade price may be taken for the purpose of modifying spreads, if there are at least 3 market trades aggregating to Rs 100 crores or more and weighted average yield on such market trades is at least at a 15 bps different spread compared to existing spread

Hierarchy for trade information sources for trade recognition

The market trades would be recognized from various sources in the following order of priority.

- 1) FIMMDA
- 2) NSE WDM
- 3) BSE
- 4) Own trades/interscheme trade

For the purpose of the recognitions of trade, the data from each of the above sources shall be evaluated independently and shall not be aggregated.

Schemes own trades

Weighted average trade price of schemes own trade may be taken if there is trade in marketable lot (i.e. Rs 5 Crores) for any security. In case of scheme trades and market trades, schemes trades will be second in priority viz a viz market trades for valuation

Since all interscheme trades would be done at current market levels and follow the principle of fair valuation like any other own trade, hence such interscheme trades would be treated at par with own trades for valuation purpose.

1.2 Non Traded Security/Thinly Traded security

A security would be considered as thinly traded / non traded if on the valuation date, it does not suffice the recognition of trade criteria as mentioned in section 1.1

1.3 Non Performing Asset

An 'asset' shall be classified as nonperforming, if the interest and/or principal amount have not been received or remained outstanding for one quarter from the day such income/installment has fallen due. Any non-performing asset will also be treated as non-investment grade asset. Provisions will need to be made for any non-performing assets (debt securities) in the portfolio as per guidelines.

1.4 Traded Price/Yield

Traded price would be used for valuation based on Recognition of Trade criteria as defined in Section 1.1. To remove distortions due to the settlement dates (e.g. across a weekend/holidays, same day value), weighted average traded yields will be used to arrive at the t+1 equivalent trade price for valuation purposes

2. Valuation Guidelines -Investment Grade Securities

2.1 Valuation of Non-Traded Securities/Thinly Traded security

Less than upto 60 days

Instruments will be valued by amortization on a straight line basis to maturity from cost or last valuation price, whichever is more recent.

However, it will be ensured that the amortized price is a fair reflection of market conditions, by comparing it to a Reference Price. Crisil and ICRA shall be providing reference yields for all securities with a residual maturity of less than 60 days. The yields would be provided in a matrix format based on the residual maturity and rating of debt instruments. The yields provided by both agencies shall be aggregated and averaged. This will be done through software which is being developed by Crisil.

Based on the relevant benchmark yield (which will be derived from the reference yield curve mentioned above based on the residual maturity and rating of each security) and a security specific spread, a reference yield for each security will be calculated on a daily basis. Security specific reference price will be calculated using the reference yield on a money market basis.

This reference price will then be compared with the amortized price of each security.

In case the difference between the reference price and the amortized price is within ± 10 bps, the security will be continued to be valued through amortization. However if on any day the price difference is more than ± 10 bps, the valuation of the security will be adjusted so as to bring the difference within a band of ± 10 bps.

Adjustment should be done on the day of the breach so as to bring the difference down to ± 5 bps.

Benchmark yield curve:

The benchmark yield curve shall be constructed by Crisil and ICRA on a daily basis, based on market trades and polling of market participants. For construction of this benchmark yield curve, traded prices / yields across all public platforms will be considered. For practical reasons, the benchmark yields will be provided for each calendar fortnightly interval, for tenors up to 91 days. Like for securities currently above 91 days to maturity, the yield curve shall be constructed in a matrix format, where each issuer can be benchmarked based on the credit rating and time to maturity.

Security Specific Spread:

An acquisition of a less than 60 day security could happen in two ways.

- a) Residual maturity of an existing security falling below 60 days.
- b) Fresh purchase of the security with a residual maturity of up to 60 days.

For every security acquired through any of the ways mentioned above, the difference between the yield of the security and the benchmark yield curve will be captured. This difference as on the first day of acquisition will be the spread for that security.

The spread of the security over the benchmark yield curve will generally be kept constant through the life of the security and shall be changed only if there is a reasonable justification for the change.

The spread will be changed if there are market trades in the same security at yields which will result in significantly different spreads, vis a vis current spreads. For any reset along these lines, we will consider two aspects.

- (i) There has to be sufficient volume of such transactions. The qualification of the same would be at least 3 trades aggregating to Rs 100 crs or more.
- (ii) A significantly different spread would mean a difference of at least 15 bps between current spreads, and spreads derived from the relevant market trades.

Any decision to change the spread based on market trade would be taken by mid-office (risk department), based on adequate documentation and justification presented by the portfolio management team and shall be presented in the subsequent valuation committee meeting for ratification.

The spread may also be changed if there is a change in credit profile of the underlying issuer which warrants a change in current spreads over benchmark yields.

The change in credit profile of an issuer may arise due to one or a combination of the following factors.

- (i) Change in credit rating of the said issuer.
- (ii) Change in the credit rating outlook.
- (iii) Significant change in the business and / or financial risk profile.
- (iv) The above three factors are not exhaustive. There can be other reasons which may be considered for evaluating the credit profile of an issuer, based on adequate data, market information and analysis.

Further, given the dynamic nature of the markets, and due to changing market conditions, the risk department (mid office), may choose to revisit spreads at any point in time, based on the inputs / information received from internal / external sources. If so, then these changes shall also be reported post facto to the valuation committee for their ratification.

Trades done by the fund in an existing holding, will lead to a change in valuation yield for that security, provided the trade is at least of a marketable lot. This would result in a change in the valuation price of the security which will be valued at the weighted average yield of all trades done by the fund on that day. The security will then start getting amortized from the new valuation price.

An own trade will also lead to a reset in spreads. Based on the traded yield, the new spread will be calculated, over the benchmark yield curve. The reference yield will then be the combination of the benchmark yield and the new spread.

Since all interscheme trades would be done at current market levels and follow the principle of fair valuation like any other own trade, hence such interscheme trades would be treated at par with own trades for valuation purpose.

2.2 Valuation of Traded/ Non-Traded Securities/Thinly Traded security

For instruments maturity beyond 60 days

The valuation of these securities will be guided by the principles of fair valuation and fair reflection of market conditions.

In case of traded instruments, the traded price will be used for valuation. In case of non-traded instruments, the valuation price will be arrived at using the reference yields (relevant benchmark yields + spread).

Traded Instruments:

- a) In case of traded instruments, the traded price will be used for valuation. However to prevent frivolous and dated prices from distorting valuations, a cut-off criteria would be employed for recognizing qualifying trades. We propose that:

- a. For instruments maturing above 1 year, the traded price may be taken if there are at least 2 trades aggregating to Rs 25 crs or more.
- b. For instruments maturing between 60 days to 1 year, traded price may be taken if there are at least 3 trades aggregating to Rs 100 crs or more.
- b) In case of own trade, we will recognize the traded price, if the traded amount is equal to or more than the market lot. Since all interscheme trades would be done at current market levels and follow the principle of fair valuation like any other own trade, hence such interscheme trades would be treated at par with own trades for valuation purpose.
- c) Since there will be more than one market trade for recognizing qualifying trades, the weighted average price will be used for valuation.
- d) For traded securities, if the traded price quoted on public platform is distorted due to forward settlement dates, the actual traded yield shall be used for valuation on a t+1 basis.
- e) In case there are both AMC trades and Qualifying Trades, the qualifying trades shall be given higher priority.
- f) In case trades in a particular security are reported on multiple platforms, the order of preference would be FIMMDA, NSE WDM, BSE and own trades in that order of priority.

Non-Traded Instruments:

- (i) The current matrix based valuation shall be used to determine valuation price.
- (ii) There will be no restriction on the allowed spread relative to the benchmark curve in respect of different issuers and instruments. The principle of fair valuation shall govern the spreads to be used.
- (iii) Any spreads (as given in the CBV) that need to be modified on account of illiquidity or security specific factors will be suggested by the Fund Management team with appropriate justifications. This will be independently reviewed /verified by Risk Management and then sent to Fund Accountants / Valuation agents for incorporation into NAV (Net Asset Value) computations..

3.9.3 Securities with both Put and Call option on the same day

The securities with both Put and Call option on the same day would be deemed to mature on the Put/Call day and would be valued accordingly. Further the valuation policy for traded /non traded securities as applicable would be applicable for securities with PUT/CALL options.

4. Valuation Guidelines – Non – Investment Grade Securities

4.1 Non-Investment Grade-Performing Asset

Category	Valuation Guidelines
4.1.1 Traded	- Traded prices would be taken
4.1.2 Non Traded – more than 182 days to maturity	- Valued at 75% of Face Value
4.1.3 Non Traded – less than and upto 182 days to maturity	<ol style="list-style-type: none"> 1. Valued after markdown by 2.5% to the Face Value every 2 weeks cumulatively starting from the day of the downgrade. The value of such discounting would remain same over the tenure of the fortnight. 2. If during the intervening period, any payments are received against the outstanding or any fees, charges received, the impact of the same shall be taken into consideration while valuing the securities in the subsequent fortnight. The Valuation Committee to review the valuation of such securities once the cumulative discounting has reached 10% of the Face Value

- Irrespective of the above policy, the valuation committee might adopt valuation principles to align with the fair valuation norms.

4.2 Non-Investment Grade -Non – Performing Asset

- Classification of an asset as an NPA, provisioning and valuation of same would be done as per SEBI circular MFD/ CIR/ 8 /92/ 2000, dated September 18, 2000.
- An asset will be classified as an NPA after a quarter past due date of interest. For e.g. if the due date for interest is 30.06.2000, it will be classified as NPA from 01.10.2000.
- After the expiry of the first quarter from the date the income has fallen due, there will be no further accrual interest accrual on the asset. For e.g. if the due date for interest falls on 30.06.2000 and if the interest is not received, accrual will continue till 30.09.2000 after which there will be no further accrual of income. That is from the beginning of the 2nd quarter there will be no further accrual on income.
- On classification of the asset as NPA from a quarter past due date of interest, all interest accrued and recognized in the books of accounts of the Fund till the date, should be provided for. For e.g. if interest income falls due on 30.06.2000, accrual will continue till 30.09.2000 even if the income as on 30.06.2000 has not been received. Further, no accrual will be done from 01.10.2000 onwards. Full provision will also be made for interest accrued and outstanding as on 30.06.2000

- Once an investment has been recognized as NPA, provisioning would be made in a manner to ensure full provisioning prior to the closure of the scheme or the scheduled phasing which ever is earlier. The provisioning against the principal amount or installments should be made at the following rates irrespective: 10% of the book value of the asset should be provided for after 6 months past due date of interest i.e. 3 months from the date of classification of the asset as NPA.
- 20% of the book value of the asset should be provided for after 9 months past due date of interest i.e 6 months from the date of classification of the asset as NPA.
- Another 20% of the book value of the assets should be provided for after 12 months past due date of interest i.e 9 months from the date of classification of the asset as NPA.
- Another 25% of the book value of the assets should be provided for after 15 months past due date of interest i.e. 12 months from the date of classification of the asset as NPA.
- The balance 25% of the book value of the asset should be provided for after 18 months past due date of the interest i.e 15 months from the date of classification of the assets as NPA. Thus, 1 1/2; years past the due date of income or 1 1/4; year from the date of classification of the 'asset' as an NPA, the 'asset' will be fully provided for.
- Irrespective of the above policy, the valuation committee might adopt valuation principles to align with fair valuation norms.

5. Valuation Guidelines -Unrated Securities

Investments in unrated papers would be assigned an internal rating by the Fund Manager, which would be approved by the valuation committee

5.1 Traded

Based on the Recognition of Trade criteria as mentioned in Section 1.1.

5.2 Non -Traded - Less than and upto 60 days to maturity

Valuation based on the approach outlined in Section 2.1

5.3 Not Traded - more than 60 days to maturity

Valuation based on the approach outlined in Section 2.2

6. Guidelines - Interscheme Transfers

Interscheme transactions will follow the same guiding principles as that for normal market trades and valuation,

1.) For less than 1 year instruments,

- a. The last 3 trades (relative to the time of interscheme) of at least Rs 25 crores each in the same/similar securities will be considered for determining the price of interscheme. Weighted average price/yield of such trades would be considered for arriving at the interscheme price.
- b. For price validation, broker market quotes may also be used. In such instances, market quotes from at least 3 market participants at the time of interscheme would be taken.
- c. If the same/ similar security is not traded on the public platform, then the interscheme price would have to be justified by the respective fund managers and mid office (risk management), with suitable reasons and documented accordingly.

The one or more than one of the above methods to arrive at the interscheme price. Such price shall be properly validated internally.

2.) For more than 1 year instruments

- a. The last 2 trades (including own trades) (relative to the time of interscheme) of at least Rs 5 crores each in the same/similar securities will be considered for determining the price of interscheme. Weighted average price/yield of such trades would be considered for arriving at the interscheme price.
- b. For price validation, broker market quotes may also be used. In such instances, market quotes from at least 3 market participants at the time of interscheme would be taken.
- c. If the same/ similar security is not traded on the public platform, then the interscheme price would have to be justified by the respective fund managers and mid office (risk management), with suitable reasons and documented accordingly.

The one or more than one of the above methods to arrive at the interscheme price. Such price shall be properly validated internally.

Similar security criteria would be as follows

- Clustering of Debt Issuer universe based on outstanding rating (long term & Short term) & type of entity.
- Similar Security Type -CD/CP/PTCs/NCDs
- Similar Maturity

7. General principle

While the fund will follow the above guidelines on an ongoing basis, there may be extraneous situations under which, in the interest of fair reflection and fair valuations, there may be deviations to the said norms. The decision on any such deviation will rest with the

risk department.(Mid office) based on substantial justification and adequate documentations. Furthermore all these deviations shall be reported to valuation committee for approval or ratification.

8. Ratification of internal rating.

Valuation committee would ratify an internal rating assigned by credit team for valuation of issuers not having a long term equivalent rating. The same would be supported by a credit note prepared by the credit team & will be monitored on an ongoing basis as a part of portfolio credit review.

9. Abnormal /Disruptive Business situations.

An abnormal / disruptive business situation from a valuation policy point of view will be one, where the existing valuation policy may unduly impact either the existing, incoming and outgoing unit holders. These situations may arise due to operational, geo political, macroeconomic disruptive events either unique to the fund or impacting the market as a whole. The onus for defining / declaring a situation / time period as an abnormal business situation will be on a committee formed. The committee shall comprising of the atleast one member of the Trustee Board , one member of the AMC board, CEO, Head of Risk, Head of Compliance, Head of Operations and Head of Fixed Income.

The AMC, under powers delegated by the Trustees, shall have absolute discretion to reject any application, prevent further transactions by a Unit Holder, delay processing redemption as per applicable laws or regulations if:

- (i) after due diligence, the investor / Unit Holder / a person making the payment on behalf of the investor does not fulfill the requirements of the KYC as determined by the AMC or the AMC believes that the transaction is suspicious in nature as regards money laundering.

(2) KYC Compliance

In order to reduce hardship and help investors dealing with SEBI intermediaries, SEBI issued three circulars - MIRSD/SE/Cir-21/2011 dated October 05, 2011, MIRSD/Cir-23/2011 dated December 02, 2011 and MIRSD/Cir-26/2011 dated December 23, 2011 informing SEBI registered intermediaries as mentioned therein to follow, with effect from January 01, 2012, a uniform KYC compliance procedure for all the investors dealing with them on or after that date. SEBI also issued KYC Registration Agency ("KRA") Regulations 2011 and the guidelines in pursuance of the said Regulations and for In-Person Verification ("IPV").

(i) Requirement for the existing investors in mutual funds (upto December 31, 2011):

For the existing investors in mutual funds who have already KYC complied and have the KYC compliance letter issued to them by CDSL Ventures Limited are exempt from following the new KYC procedure effective January 01, 2012 for the purpose of making additional investment with any SEBI registered mutual fund.

If, however, the KYC compliant investors would like to deal with any SEBI registered intermediary other than mutual funds, they will have to follow the new KYC compliance procedure.

(ii) Requirement for the new investors in mutual funds (From January 1, 2012) :

With effect from January 01, 2012, all investors other than KYC compliant investors as defined above are required to follow the new KYC compliance procedure as mentioned below while making any investing with the Fund:

- Provide the complete details in the KYC application form along with the required documents (for individual investors or non-individual investors as appropriate). The said form is available on RMF's website i.e. www.reliancemutual.com or on the website of Association of Mutual Funds In India i.e. www.amfiindia.com or on the website of any authorised KRA's.
- KYC application and necessary document should either come along with financial transaction or when the client chooses to trade / invest / deal through the Intermediary and an account is opened in the schemes of RMF, the investor is required to submit, in person, the completed KYC application form along with all the necessary documents as mentioned in the KYC application form in any of the offices of the distributors (details provided in the following note) or Registrar and Transfer Agent of the RMF / RCAM i.e. Karvy Computershare Private Limited and the RMF;
- In line with SEBI circular MIRSD/Cir-26/2011 dated December 23, 2011, it is mandatory for SEBI registered intermediaries to carry out "In-Person Verification" ("IPV") of any investor dealing with a SEBI registered intermediary for investments in a mutual fund, the Asset Management Companies, Registrar & Transfer Agent and distributors who comply with the certification process of National Institute of Securities Market (NISM) or Association of Mutual Funds in India (AMFI) and have undergone the process of "Know Your Distributor (KYD)" are authorised to carry out the IPV. However, in case of applications received by the mutual funds directly from the clients (i.e. not through any distributor), they may also rely upon the IPV performed by the scheduled commercial banks. Unless the IPV process is completed, the intermediary will not be able to process the KYC and obtain a temporary acknowledgement for submission of all the documents. Hence the investor will not be considered as KYC compliant under the new KYC compliance procedure and hence will not be permitted to make any investment in the Fund;
- Once all the documents are verified by a KRA, they will send the investor a letter within 10 working days from the date of receipt of necessary documents by them from the Fund or its Registrar and Transfer Agent informing the investor either about compliance by the investor of the new KYC compliance procedure ("**final acknowledgement**") or any deficiency in submission of details or documents.
- On the basis of the temporary acknowledgement or the final acknowledgement the investor would be eligible to deal with any of the SEBI intermediaries as mentioned in the above mentioned SEBI circulars.

(3) Investors are requested to note the following provisions shall be applicable for "KYC Compliances" with effect from December 1, 2012:

- 1) In case of an existing investor of RMF and who is already KYC Compliant under the erstwhile centralized KYC with CVL (CVLMF) then there will be no effect on subsequent Purchase/Additional Purchase (or ongoing SIPs/STPs,etc) in the existing folios/accounts which are KYC compliant. Existing Folio holder can also open a new folio with Reliance Mutual Fund with the erstwhile centralized KYC.
- 2) In case of an existing investor of Reliance Mutual Fund and who is not KYC Compliant as per our records, the investor will have to submit the standard KYC Application forms available in the website www.cvlkra.com along with supporting documents at any of the SEBI registered intermediaries at the time of purchase / additional purchase/ new registration of SIP/STP etc. In Person Verification (IPV) will be mandatory at the time of KYC Submission. This uniform KYC submission would a onetime submission of documentation.
- 3) Investors who have complied with KYC process before December 31, 2011 (KYC status with CVL-KRA as "MF - VERIFIED BY CVLMF") and not invested in the schemes of Reliance Mutual Fund i.e not opened a folio earlier, and wishes to invest on or after December 01, 2012, such investors will be required to submit 'missing/not available' KYC information and complete the IPV requirements.

Updation of 'missing / not available' KYC information along with IPV is currently a one-time requirement and needs to be completed with any one of the mutual funds i.e. need not be done with all the mutual funds where investors have existing investments. Once the same is done then the KYC status at CVL-KRA will change to 'Verified by CVL KRA' after due verification. In such a scenario, where the KYC status changes to 'Verified by CVL KRA', investors need not submit the 'missing/not available' KYC information to mutual funds again.

- a) In case of Individual investors, following details needs to be submitted:
 - i. Father's/Spouse's Name,
 - ii. Marital Status,

- b) In case of Non Individual investors, complied with KYC process before December 31, 2011, KYC needs to be done afresh due to significant and major changes in KYC requirements.

All investors (individual and non-individual) are required for KYC compliance. However, applications should note that minors cannot apply for KYC compliance and any investment in the name of minors should be through a Guardian, who should be KYC compliant for the purpose of investing with a Mutual Fund. Also applicants/ unit holders intending, to apply for units currently holding units and operating their Mutual Fund folios through a Power of Attorney (PoA) must ensure that the issue of PoA and the holder of the PoA must mention their KYC compliance status at the time of investment. PoA holders are not permitted to apply for KYC compliance on behalf of the issuer of the PoA, Separate procedures are prescribed for change in name, address, and other KYC related details, should the applicant desire to change such information, POS will extend the services of effecting such changes

The distribution of the SID, read with this SAI and the offering, subscription, sale or transfer of the Units thereof in certain jurisdictions may be restricted or regulated by appropriate laws. No action has been or will be taken in any jurisdiction that would permit or tantamount to permit a public offering of the Units or the possession, circulation or distribution of the SID or SAI or any other offering, marketing or publicity material relating to any Scheme or the Units, in any country or jurisdiction (other than India), where any action for such purpose(s) is required.

Accordingly, the Units may not be marketed or offered or sold, directly or indirectly, and neither the SID nor the SAI or any other offering, marketing material, circular, form of application or advertisement in connection with the Units (collectively referred to as "Offering Material") may be distributed or published, in or from any country or jurisdiction unless such marketing, offer or sale or circulation, etc is in compliance with all applicable laws and regulations of any such country or jurisdiction. C. GENERAL INFORMATION

(1) Security Lending

In accordance with the Mutual Fund Regulations the Fund may engage in stock lending activities. Accordingly, the Scheme may lend securities to the extent of its entire portfolio of the Scheme to any borrower through an approved intermediary. The Securities will be lent by the approved intermediary against collaterals received from the borrower, for a fixed period of time, on expiry of which the securities lent will be returned by the borrower. It may be noted that this activity would have the inherent probability of collateral value drastically falling in times of strong downward market trends, resulting in inadequate value of collateral until such time as that diminution in value is replenished by additional security. It is also possible that the borrowing party and /or the approved intermediary may suddenly suffer severe business setback and become unable to honour its commitments. This along with a simultaneous fall in value of collateral would render potential loss to the Scheme. Besides, there can also be temporary illiquidity of the securities that are lent out and the scheme may not be able to sell such lent out securities.

(2) Inter Scheme Transfer of Investments

The Scheme may purchase / sell securities under the Scheme through the mode of inter-Scheme transfers, if such a security is under the buy / sell list of the Scheme and is on the sell / buy list of another Scheme under the Fund. Transfers of investments from one scheme to another scheme in the same mutual fund shall be allowed only if,-

- (a) such transfers are done at the prevailing market price for quoted instruments on spot basis. (Spot basis shall have same meaning as specified by stock exchange for spot transactions)
- (b) the securities so transferred shall be in conformity with the investment objective of the scheme to which such transfer has been made.

The valuation of untraded / unquoted securities and debt instruments shall be done in accordance with the general valuation policies of the Fund. Inter scheme Transfers into liquid schemes would additionally adhere to SEBI circular SEBI/IMD/CIR NO.13/150975/09 dated January 19, 2009.

(3) Underwriting by the Scheme

Subject to Regulations, the Scheme may also undertake underwriting activities in order to augment its income, after the Mutual Fund obtains a certificate of registration in terms of the SEBI (Underwriters) Rules and SEBI (Underwriters) Regulations 1993 authorising it to carry on activities as underwriters. The total underwriting obligations of the Scheme, at any time, shall not exceed the total value of the corpus of the Scheme together with undistributed profits lying to the credit of the Scheme. The decision to take up any underwriting commitment shall be made as if the Scheme is actually investing in that particular security. As such, all investment restrictions and prudential guidelines relating to investments, individually and in aggregate as mentioned in Regulations shall, in so far as may be applicable, apply to underwriting commitments which may be undertaken under the Scheme.

(4) Borrowing by the Mutual Fund

To meet the temporary liquidity needs of the Scheme for the purpose of repurchase, redemption, or payment of income /dividend to the unit holders, the Scheme may borrow upto 20 percent of its net assets for a period of upto six months or as may be permitted by the regulations. Loans may be obtained from any entity / organisation which are not specifically debarred to give loans to Mutual Funds and also loan is available from such entity / organisation at competitive terms. However, if loan is obtained from any associates such loans will be obtained only at extremely competitive terms at equal to or lower than market rates. These loans may be secured by securities or assets of the Scheme pledged to such entity / organisation. Borrowing by the Mutual Fund on account of the Scheme will tend to increase the impact of investment gains and losses on the NAV of the Scheme

There were borrowings for the Financial year ended March 2011, March 2013 and period ended July 2013. However there were no borrowings for the year ended March 2012. The same were disclosed in the various reports placed to Trustees from time to time.
